Re: Johnston Acres- Water and Sewer

Dear Mr. Christianson:

The City of Libby has retained Thomas, Dean and Hoskins to complete the design, plans and specifications for the construction of a new water system to serve the area shown on the enclosed site map. Construction will include the excavation and placement of water mains in the existing street right-of-ways and individual services to each residence.

We are requesting EPA review the available records for the area to determine if there are properties which are known to be contaminated with asbestos. If so please, contact us.

The project also includes sewer mains in the street right-of-ways, as well as, services to each residence.

We understand properties in the area may have been surveyed as part of the clean up activities. If so, are copies available for the Cities use?

If you have any questions please feel free to contact me.

Sincerely,

THOMAS, DEAN & HOSKINS, INC.

Michael W. Fraser, P.E.
